Water News Release (HQ): New Web Site Helps Kids Identify the Healthiest Fish to Eat

News for Release: Friday, August 1, 2008

U.S. Environmental Protection Agency (EPA)

New Web Site Helps Kids Identify the Healthiest Fish to Eat

Contact Information: Enesta Jones, (202) 564-4355, jones.enesta@epa.gov

(Washington, D.C. – August 1, 2008) The U.S. Environmental Protection Agency launched a new Web site at www.epa.gov/fishadvisories/kids/ to help children and their parents choose the healthiest fish to

eat, using interactive stories and games. The site has been selected as the August site of the month by kids.gov, the official kids' portal for the U.S. government.

"Our new Web site is a fun way for kids and parents to learn about the importance of fish in a healthy diet and how to choose the healthiest fish to eat," said Benjamin H. Grumbles, EPA's assistant administrator for water.

Whether they catch their own fish or buy it at a store, children and their parents can use the Web site to learn how to select fish that are low in contaminants. The Web site includes stories focusing on different methods of obtaining fish, along with interactive games, to teach children ages 8-12 how to recognize common fish species and use fish advisories.

The site can be viewed at: www.epa.gov/fishadvisories/kids/
